Curating sustainability into the Modern
Workspace

Curating sustainability into the Modern Workspace

Sustainability affects every part of the communities and organisations we live and work in. As the curators of your modern workspaces, we partner with architects, interior designers and builders to deliver high-performance furniture and workspace solutions.

Each part of the Zenith business is built on sound principles of sustainability, from materials selection and manufacturing, through to our methods of distribution, installation, implementation and recycling.

A Holistic Approach to Sustainability

A thriving business is a sustainable business because it creates environments that support the long term health, wellbeing and ambitions of the people it employs and the communities it supports.

By enabling you to create environments which support the long term health and wellbeing of your people and the local community, we ensure the long term viability and relevance of your business.

Partnerships and Collaborations

Our products and process certifications align themselves with global industry-wide best practices. Each product or solution is designed and built with building environmental and sustainability and building occupant health in mind.

Zenith has the relevant certifications to enable us to have independent verification of environmental and sustainable, technical and safety standards in design, procurement, manufacture and supply of products.

Sustainability is an end-to-end, Collaboration with Clients and Partners

Sustainability is inter-connected and reciprocal, and can only work through partnerships and long-term relationships with supply chain and logistics partners.

Working collaboratively with our customers we select imaginative, intelligent and high-performing furniture that is crafted with expertise and integrity from sustainable sources.

By becoming part of each other's sustainable, end-to-end supply chain we'll enable you to:

- Support your OH&S and Employment policies
- Attain GECA or GREENGUARD accreditation's
- Build a modern working environment in which your people can thrive.

Introducing Zenith Sustainability in action

Zenith Rx4 is our holistic sustainability program. Inspired by the three pillars of sustainability it enables us to develop a holistic approach to sustainability.

It ensures we stay focused on the principles of **Responsibility, Relevance, Recycling and Reduction through** each part of our vertically integrated business model. Plus, it aligns with our sustainability approach with our clients and supply chain partners to ensure sustainability at Zenith has a genuine impact on the community.

Responsibility. Relevance. Recycling. Reduction.

Responsibility in materials selection and design leads to the extended **Relevance** of our products and solutions, which in turn, extends their life-cycle.

Our business wide **Recycling** policy works hand in hand with our commitment to **Reduce** our use of new materials in favour of renewables, and to reuse wherever
