Precinct

By Zenith Design Studio

The spaces

within

the space

As more organisations embrace hybrid work, the modern workspace becomes a progressive 'precinct' that supports, in-office, remote and on-the-go work: A nexus of utility and adaptability, where employees can concentrate on focused independent tasks, or connect and collaborate in a more informal manner.

This new workplace is a productive precinct: A thriving hub of connected networks, performing a host of independent and shared activities. With this understanding, Zenith announce the third release of the Precinct range. A collection of flexible and versatile structures that offer spatial fluidity for individual and group needs.

The Precinct collection is a series of individual elements that when combined, create 'spaces within spaces': New working environments tailored to singular or collective needs. With over 100 pieces within the range, including lounge modules, ottomans, work pods and screens, the latest release for Precinct Pod is the final puzzle piece in the Precinct range.

Lounge Modules

Precinct Lounge Modules offer both standalone comfort seating and, when configured with other collection pieces, a wrap-around alcove that envelops employees in their individual work or in their collaborative meeting. Screens can be added to ensure privacy within a busy environment or to segment and arrange the open-plan space.

Ottomans

Precinct Ottomans complete the picture. The ottoman series allows each precinct to be as enclosed or open, as formal or informal as the employee desires. Small and round for a leg rest or coffee perch, or wide and angular for a collaborative meeting, the ottomans are available in a wide range of shapes and sizes.

A self-stabilised upholstered screen, Precinct Divide segments spaces within the open-plan workspace. Functional as privacy partitioning and shield from visual distraction or as a mobile wall to create new work environments seamlessly and impermanently. Precinct Divide is available in four sizes, varying heights and widths and has a bold cone-shaped supporting base.

Divide

Focus Lounge

Living room or workspace? Precinct Focus Lounge offers a soft-seating haven within the busy work environment. High screens hug the lounge to foster concentration for individualised work scenarios or participation for collaboration and ideation. Precinct Focus Lounge comes in three sizes that cater to the spectrum of work scenarios, Focus Solo, Focus Duo and Focus Trio.

Meet Booth

Precinct Meet Booth provides a room within the room. Available in both low and high screen encasing, the Meet Booth caters to the full spectrum of workplace modalities. The low screen option builds a room for informal catch-ups with colleagues and vibrant collaboration.

High screen creates an enclave within the bustling workspace for focused work and private group work.

The D-shaped centre table, designed with the aesthetic capacity to act as both a casual café table or a work desk, includes table-top power options. The Precinct Meet Booth is available in various sizes and heights.

Pod

Precinct Pods are agile, insightful and adaptive. Their refined ingenuity reveals a prescient understanding of the many ways we work. Precinct Pod is an acoustic-panelled system that creates a variety of workspaces for countless work modalities, from a bookable desk for a hybrid worker, to an enclosed retreat for an online meeting. Offering 3 new shapes geometrically designed to standalone or as configurable clusters, with fixed height or adjustable worktops, Precinct Pods provide maximum freedom and adaptability to work your way.

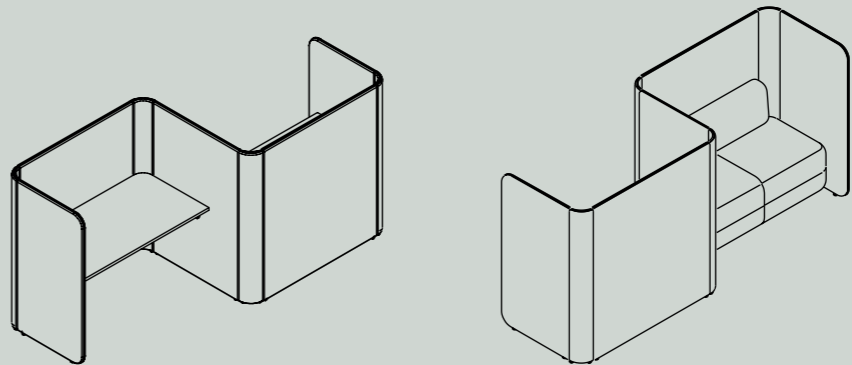

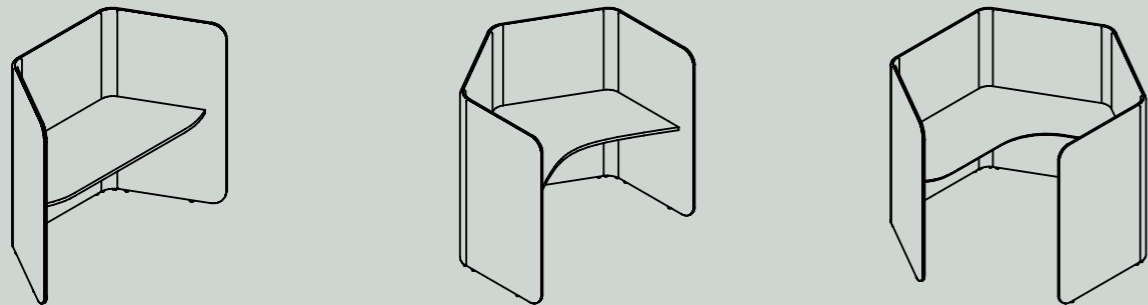

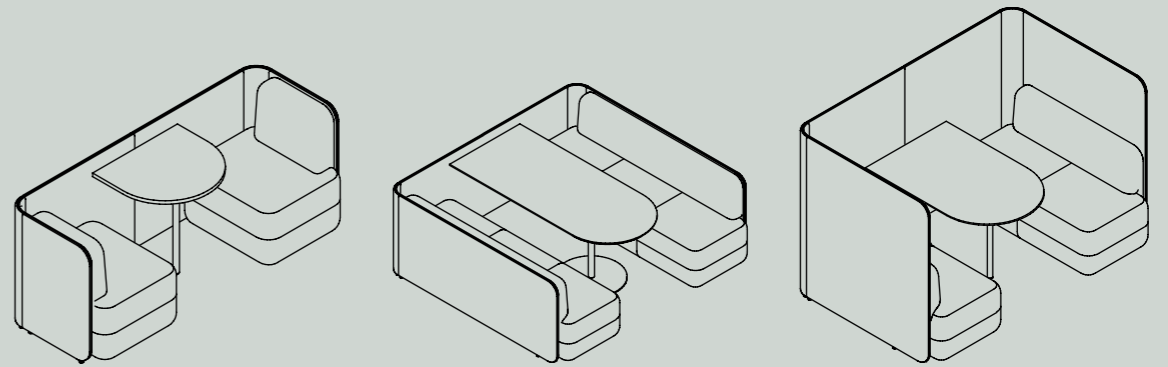

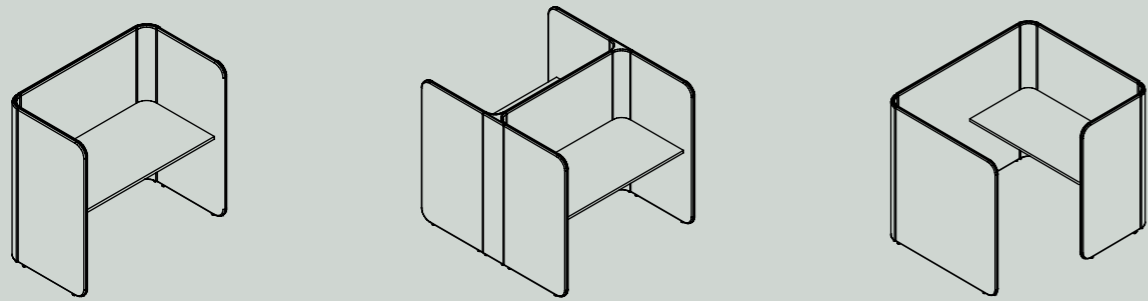

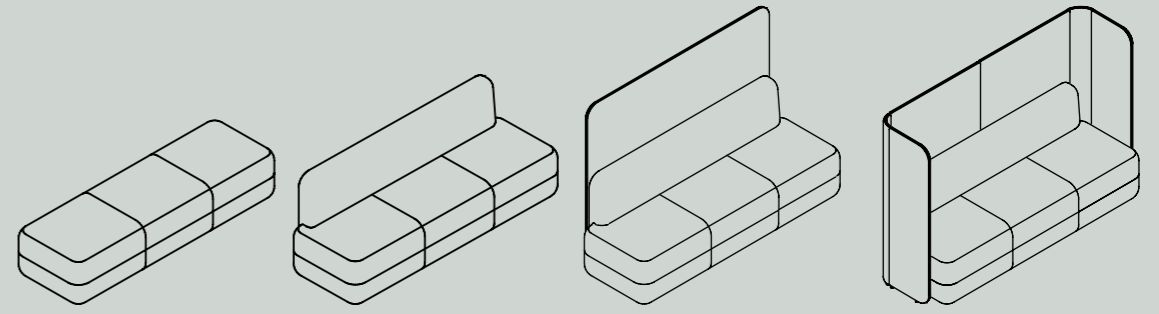

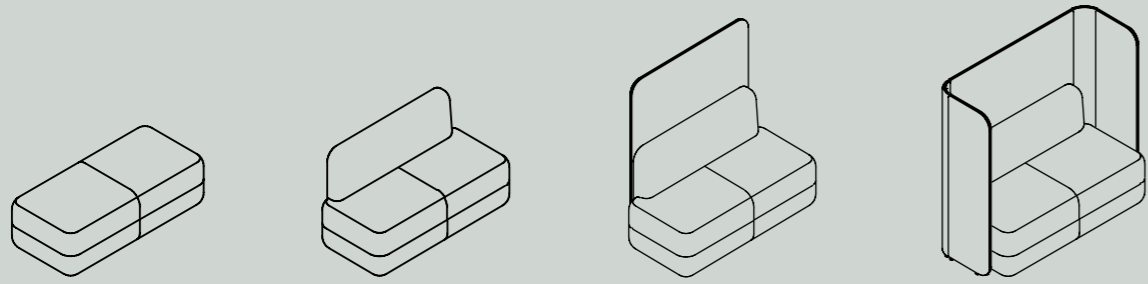

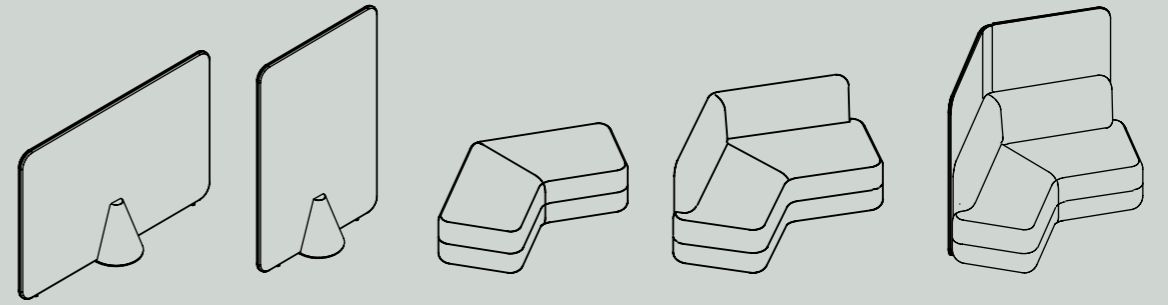

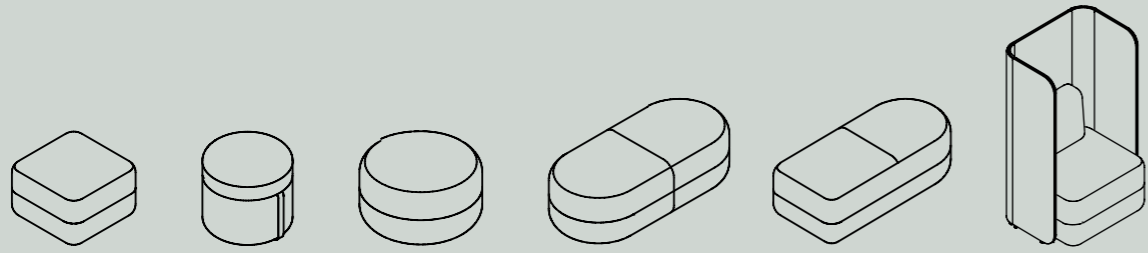

Screens

Precinct Screening Systems provide the focus of the booth for the individual desk and workstation. The table and desk-top privacy solution is offered in a spectrum of coverage, with single or double-sided fold for partial or complete enclosure. Lightweight and reconfigurable, the frameless system sits flush atop any worktop to create clean and delineated workspaces.

The modern workspace exists between two worlds. Between the comfort of home and the concentration of work, between formality and informality, between collaboration and individualisation. With Zenith's Precinct Collection, workspaces are capable of creating 'moments' that cater to both modalities.

Zenith

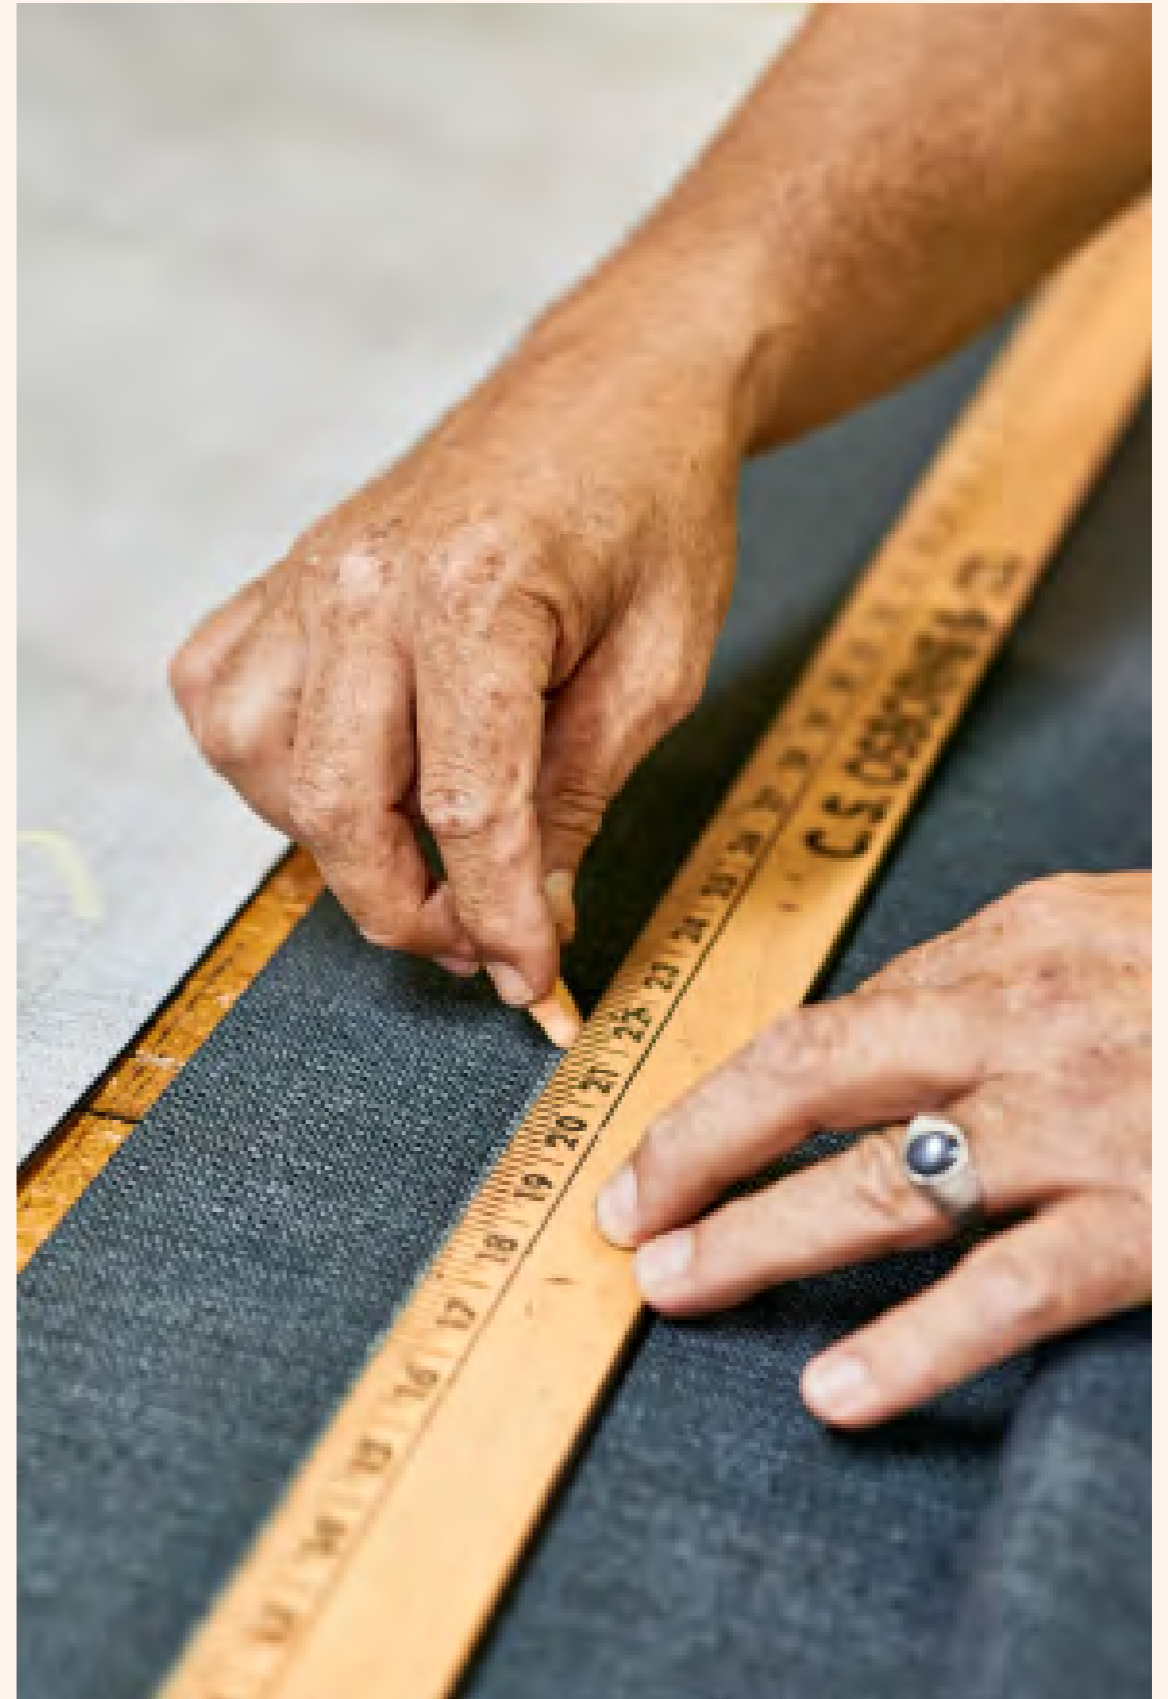

Design

Studio

Understanding and collaborating with the client ensures all outcomes are achieved.

ZENITH's capacity to research, prototype and test products is an integral part to their design process. By putting an emphasis on researching global trends and anticipating the ever-changing climate of technology in the work environment, ZENITH not only responds to demands in the market but pioneers and innovate.

With the capability and facilities to manufacture locally, ZENITH products are exceptionally designed, customised and thoroughly tested for product suitability and usability to suit individual needs and user requirements.

Zenith

We've worked with interior designers, architects and workplace curators for many years. Together, we've developed a range of internal workspace environments. We work alongside these curators of modern workspaces to redefine the environments where people live, work, socialise, interact and learn.

Contemporary workplaces have to combine leading edge technology and physical elements in a way that produces productive environments for organisations. And every organisation is unique. So before we recommend a solution, we work hard to understand the organisation and the people who define its culture.

Our local teams and showrooms deliver the support you need. Our global logistics guarantees the highest quality product, service and delivery schedules.
